

EPA conducted extensive air monitoring using the Trace Atmospheric Gas Analyzer (TAGA) on 9/5/17 and 9/6/17 in the Manchester community. Benzene was observed at many locations at levels less than 1 part per billion by volume (ppbv). A benzene concentration at 19 ppbv was observed around Avenue L and 97<sup>th</sup> Street. Toluene and xylene were also observed at levels less than 20 ppbv. The air concentrations of benzene, toluene and xylene are below the TCEQ short-term XXXXXXXX (XXX) of XX ppbv, 1,200 ppbv and 510 ppbv, respectively."
